Hep B Two dose alternative adolescent schedule (recombivax HB given at age 11-15 years x2 doses) is acceptable if properly documented.														
The minimum age for the 3rd dose of Hep B is 24 weeks of age.														
DTaP Four doses of DTaP/DTP/DT are acceptable if 4th dose was administered on or after child's 4th birthday.														
Polio Three doses of Polio are acceptable for all grades if the 3rd dose was given on or after the child's fourth birthday and														
at least 6 months after the previous dose with only one type of vaccine used (all OPV or all IPV).														
For students in grades K-5th grade the final dose must be administered on or after the 4 th birthday, and be administered at least 6 months														
after the previous dose.														
Live Vaccines (MMR, Varicella & LAIV) Live vaccines that are not administered on the same day must be administered a minimum of 28 days apart.														
The second dose should be repeated if the doses are separated by less than 28 days.														
Varicella Physician documentation of disease history, including month and year, is proof of immunity for children entering preschool through 8th grade.														
Parental report of disease history is acceptable for grades 9-12.														
Tdap There is no minimum interval from the last Td dose.														
MCV4 Individuals who receive dose 1 on or after their 16th birthday only need 1 dose of MCV4.														
Hep A The minimum interval between 1st and 2nd dose of Hepatitis A is 6 calendar months														
For children who have delayed immunizations, please refer to the 2016 CDC "Catch-up Immunization Schedule" to determine adequate														
immunizing doses. All minimum intervals and ages for each vaccination as specified per 2016 CDC guidelines MUST be met for														
a dose to be valid. A copy of these guidelines can be found at http://www.cdc.gov/vaccines/schedules/
